## Experience

### Microsoft

Software Engineer

Redmond, WA

Sept 2022 - Aug 2024

- Implemented language backfill logic and enhanced language extraction for **+2 Billion** Urls indexed by Bing, exposing rich content for **+100 million** businesses in **+150** different markets on Bing. (**C#**)
- Improved the coverage of Bing Amenities for **+6 Million** new businesses (**+55%** feature coverage improvement). Enhanced Bing Amenities quality by **+30%** leveraging **LLMs**, benefiting **+14M** businesses and reducing frequency of user-reported Bugs by **+80%**. (**C#, Python**)
- Engineered automated pipeline (**ADF**) for discovering new domains for Bing; onboarded **+500** new providers, enriching data for **+2.7B** businesses. Managed vendor team to develop models for **HTML** content extraction from new domains, integrating content into Bing. (**SQL**)
- Developed real-time monitoring dashboard for Bing rich data with routed alerts for quick, **on-call** response to data outages & bugs. (**HTML**)

### Huawei Technologies Canada

Software Engineer Intern

Markham, ON (Remote)

May 2020 - Aug 2021

- Collaborated with a team of architects & engineers to develop (**C/C++**) the infrastructure for a distributed database leveraged in **5G networks**.
- Optimized storage processing logic & improved transactional procedures in a distributed database system (**C++, SQL**).

## Skills

**Software** Python · C# · C++ · JavaScript · SQL · HTML · CSS  
**Frameworks** React.js · Node.js · Flask · FastAPI · .NET  
**Technical** Linux · Bash · Git · AWS · Docker · LLMs · PostgreSQL · MongoDB

## Projects

### Pebbles

University Design Team Recommendation App

Toronto, ON

Jun 2021 - Sept 2022

- Created recommendations application to cluster students & professors into engineering design teams based on internal & external signals/interests
- Full stack application with database (**AWS DynamoDB**), backend API (**Python + AWS**) & frontend application (**TypeScript**)

### Course Finder

Course Planning Web App

Toronto, ON

Sept 2021 - May 2022

- Created full stack application designed for course registration & selection at University of Toronto, with user profile & authentication
- Integrated database (**PostgreSQL**), backend API (**Python Flask + SQLAlchemy** ORMs) & frontend application (**React.js**)

## Education

### University of Toronto

B.S. (Honours) in Computer Engineering

Toronto, ON

Sept 2017 - May 2022

- 3.72 GPA
